- Cadet Leadership must conduct mission analysis, planning, movement, and execution of each day's training schedule—for evaluation of their performance and potential.
- Critical counseling feedback from TACs or evaluators with cadets on their leadership performance consumes two hours of each day.
- Each training committee relates their tasks to a 'real world' warrior vignette in which a Soldier has used those committee tasks to accomplish the mission.

Initial Cadet Adaptive Challenges

- Cadets immediately flow through seven days of individual skills training and certification (Land Nav, APFT, BRM, CWST) under continuous leadership development and assessment.
 - Execute dismounted day and night Land Navigation; forced to use all aspects of map reading, terrain association, movement and route selection, navigation methods, and time management to succeed.
 - Prove comfort in water environment by passing CWST, prove comfort level with the Army's basic weapon (M16A2).
 - Gain familiarization with Infantry Squad weapons: M249, M203, AT-4, and M18 Claymore Mine.

Train the Cadet, Test the Character

- Six days of training overcoming physical challenges, personal fears, and continuing foot marches to prepare for the 10-day collective skills training.
 - Prove strength, agility, individual and team adaptability, and Warrior Ethos through the High Confidence Course, Obstacle Course, Rappelling, and Leader Reaction Courses.
 - Build initial movement techniques and planning skills conducting footmarches to and from confidence course training.

Build the Team and Leader Skills

- 1st Aid: Cadets are trained and tested on basic 1st Aid skills of evaluating, treating, and evacuating a casualty. Cadets then conduct a Squad-level First Aid course where they have to evaluate / treat / evacuate a casualty through a series of obstacles and then call in Medevac using the standard 9-line request.
- ITT Tasks trained: Basic Assembly Area operations, actions on objective, squad troop leading procedures, conduct individual movement techniques, move over/through/around obstacles, operate as a member of a Fire Team, operate as a Fire Team Leader, EPW procedures, knock out bunker, and the MOUT task of enter and clear a room.
- ITT Tactical Assault Course is a 400 meter cross-country Fire Team maneuver course incorporating all of the above tasks, route selection, and decision-making.
- Fire Support incorporates leader skills of planning direct and indirect fires and targets. Cadets plan / call for / adjust indirect fire.

Adapt to Challenges

- Cadets train to standard and throw a live hand grenade. The IED / UXO station provides initial exposure to IED / UXO ordnance, later reinforced at STX training. The new Field Hand Grenade Assault Course will provide a realistic, physically exhausting buddy team maneuver exercise in which cadets must use tactical skills and decision-making to approach and effectively engage typical COE targets with grenades in natural terrain (vice the current fixed course).
- FLRC evaluates every cadets' ability to adapt to unforeseen challenges while on a mission, and problem solve/plan/overcome obstacles under extremely compressed timeframes.

Develop and Evaluate the Potential

- 10-day Field Training Exercise in which cadets build on the Tactical Assembly Area principles they learned at ITT to include positioning key weapons, establishing subordinate element sectors, planning indirect fires, and executing priorities of work.
- Regiments deploy to the Operational Area and each squad conducts up to 24 missions over four days at Squad STX.
- Cadets occupy Platoon-size TAA sectors to conduct Platoon-level tactical preparation for section-level patrolling missions. The TAA must be secured by local patrols and by incorporating all previous learned security operations tasks.
- Cadet patrols conduct two 6-8 hour missions per day, secure and occupy patrol bases overnight, conduct limited security operations and patrols at night, and conduct a movement for extraction from the Operational Area, and a Victory March of 8km into the Regimental area.

Learn Leadership Agility

- Cadets enter the SQD STX environment, deploying into nightly platoon-size TAAs. The first day and night of training is Security Operations and Occupy an Assembly Area, with related training continuing each night.
- The first two days of SQD STX are MTP-type (FM 7-8) doctrinal missions, and the last two days incorporate dynamic COE variables. Examples are:
 - Secure a CP
 - React to sniper
 - Conduct LOGPAC
 - React to surrendering enemy soldier
 - Recover a vehicle (HMMWV)
 - React to refugees
 - Deal with media
 - Encounter IED
 - Evacuate KIA/WIA

Demonstrate Leadership in the COE

- All patrols are Combat or Reconnaissance Patrols or will integrate FM 3-21.8 tasks if published in time, and all have a dynamic COE event and/or change of mission incorporated. Examples include:
 - IED with Medevac
 - Seize weapons cache,
 - React to/move to/secure vehicle and/or casualties left in an ambush site by a passing convoy
 - Rescue/evacuate downed helicopter crew
 - Move to/secure a UN food distribution site that has a developing crowd control problem
 - Embed a media reporter/cameraman in the patrol (for the duration of the patrol)
 - Recon/secure a suspected mortar position that just fired on a base camp perimeter.
